# The Frog

Frogs have four legs.

Two of their legs are jumping legs.

Frogs can jump very well.

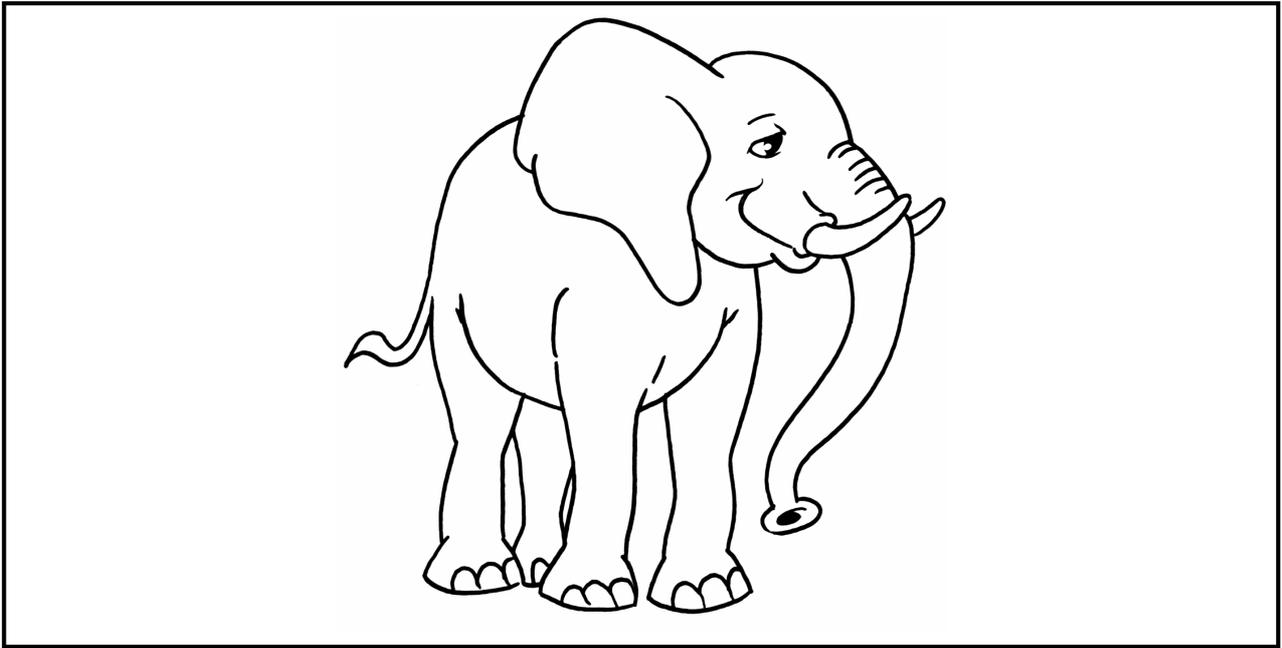

They have a long tongue to catch insects.

Insects are their favourite meal.

Frogs often live on land but they need a pond to get babies.

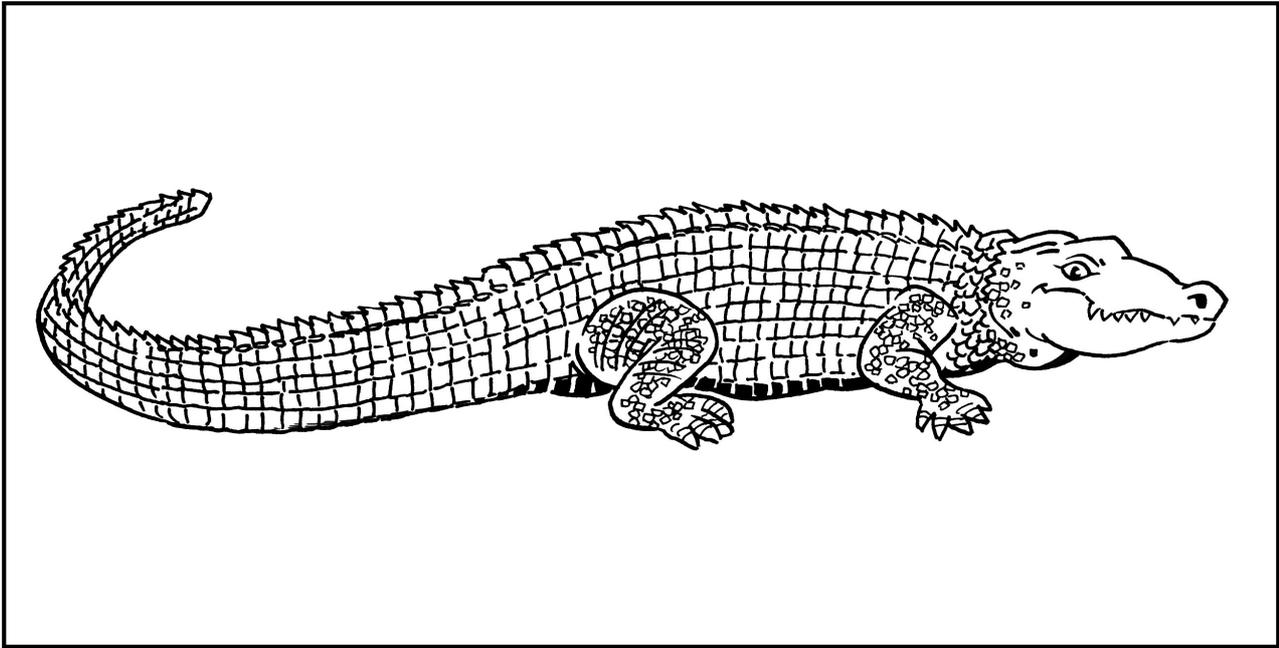

Frogs live all over the world.

# The Elephant

Elephants are very large animals.  
They have large ears and a long trunk.  
They have two white tusks, too.  
They use their trunk to get food.  
Elephants eat plants.  
They like to eat roots, leaves, grasses and  
fruits.  
Elephants live in Africa and Asia.

# The Crocodile

Crocodiles have got a big mouth with big teeth and a long tail.

Their legs are very short.

Crocodiles live in the water but they go on land to sunbathe. Crocodiles keep growing all their life.

Crocodiles eat meat and fish.

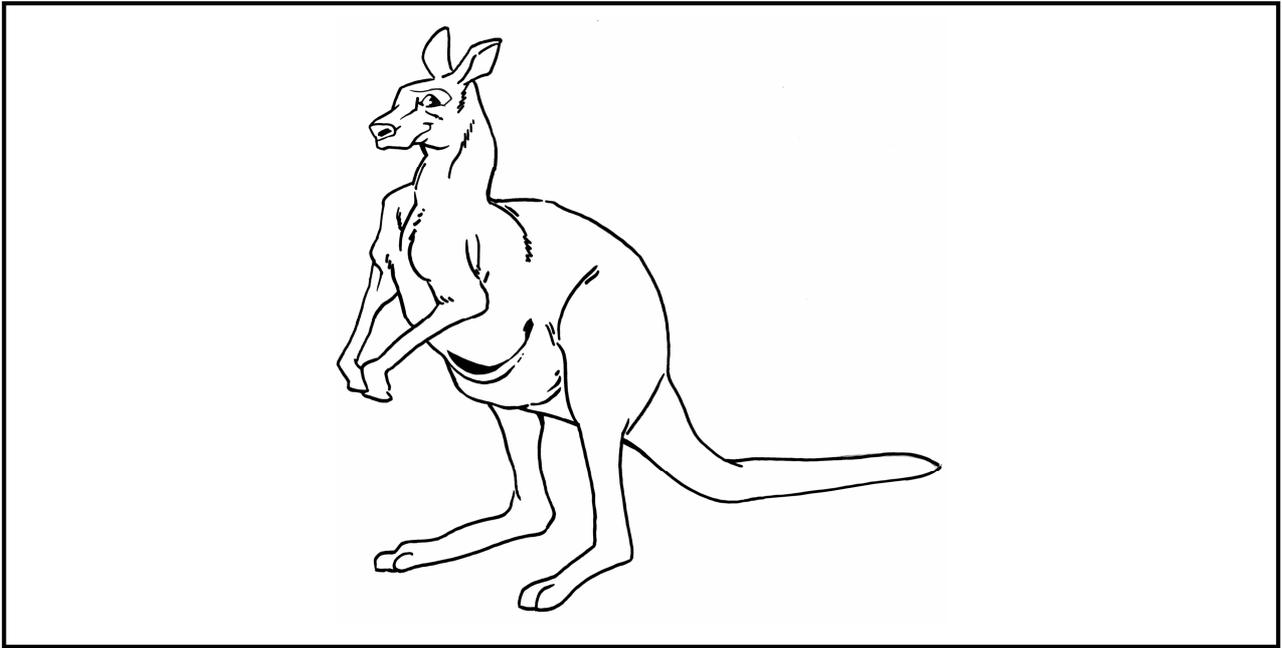

They live in America, Africa, Asia and Australia.

# The Monkey

Monkeys have two legs and two arms. They use their hand to collect food and can stand upright like humans. In the rainforest monkeys can swing from branch to branch. Monkeys eat everything but bananas are their favourite food. Monkeys live in Africa, Asia and America.

# The Kangaroo

Kangaroos have a pouch.

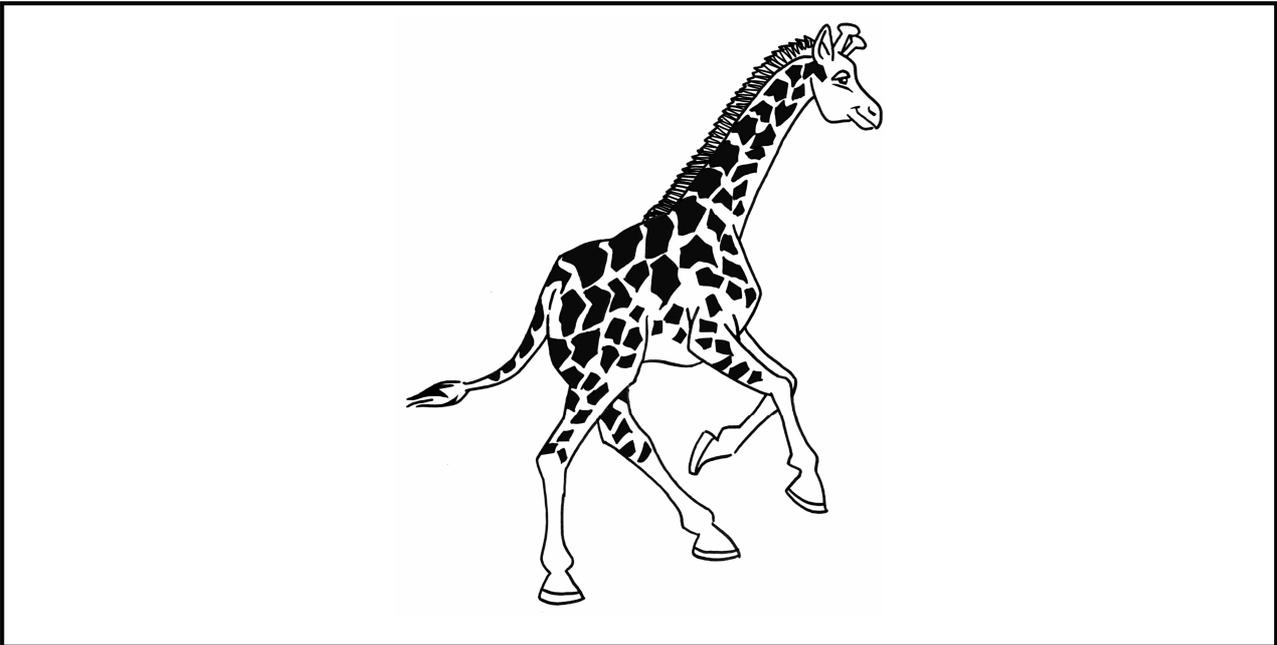

Newborn kangaroos live in the pouch for ten months.

Kangaroos have strong legs to jump.

They eat plants like grass, leaves and flowers.

Kangaroos live in Australia.

# The Giraffe

The giraffe is the tallest land-living animal. Giraffes have long legs and a very long neck. Their tail is very long, too.

On their head they have two short horns. The horns protect the head when giraffes fight.

Giraffes can run very fast.

Giraffes eat plants.

They like leaves, twigs and fruits.

They use their long tongue to get leaves from the trees.

Giraffes live in Africa.
